

Apex Mgmt.,

I wanted to thank you for providing such a pleasurable purchasing environment for me and my company. I will always look to APEX first on my used truck purchases, because they take such pride in the trucks they choose to put their name on.

Making a truck purchase from a retailer online can be an extremely worrisome transaction, with so many dollars at stake, mistakes are unacceptable. Apex has taken all the fear out of this type of transactions because of the high degree of inspections put on each vehicle.

The staff is extremely knowledgeable about the disposal business, and made sure that I thought about all of my potential needs before final purchase. You all bent over backwards to make sure the truck was adjusted to my specific dumpster specifications. You added a really nice Donovan Tarper system and had the truck inspected.

Apex is the only company I would ever purchase a truck sight unseen from. When my truck was delivered here in Nashville, I took it to my mechanic the very next day, and he was absolutely floored at how well kept the truck was and he couldn't find any flaws not even a loose nut on the truck. The truck was absolutely as advertised.

Feel free to give my name and number out to any potential customers that need to hear from an out of state reference and I will proudly state that this is a company of Honor and Integrity.

Thank you so very much!
