

Our search for a dump truck began when we were awarded a community project with a limited completion date. The dump trucks we currently own were not sufficient for the load capacity we needed.

We tried looking through Craigslist, Truck Trader, and online searches, with no real success in finding what we needed. We happen to be your neighbor, and noticed you might be an option for our truck search.

When we enquired, we most liked the fact that a warranty was available. This along with the pricing, is what sold us on your company.

We are very happy with the refurbished truck we selected, and have recommended your company to other people in our industry.
